INTRODUCTION

This is the fourteenth weekly literature report from the Public Health England Behavioural Science Reference Cell. The report aims to highlight a selection of COVID-19 related work in the field of behavioural and social science (mostly) released from the 7th – 14th August 2020. Please note the report is not a perfect product and the inclusion or omission of a publication should not be viewed as an endorsement or rejection by PHE. Additionally, the authors of this report do not accept responsibility for the availability, reliability or content of the items included in this report and do not necessarily endorse the views expressed within them.

Please feel free to forward this email to your colleagues.

If you have any feedback on this mailing, content for inclusion in future reports, or would like to be added to the mailing list, please email:

HIGHLIGHTS

As we know how time pressured everyone is at the moment, the authors of the digest have selected three recommended items from the lists below. This week these are:

- Finding a path to reopen schools during the COVID-19 pandemic, W
 John Edmunds, The Lancet: Child & Adolescent Health, 3rd August 2020.
- 2. <u>Views of young people, their parents/carers and teachers about reopening secondary schools: The Back to School study interim report 1, Ava Lorenc et al., NIRH, 11th August 2020.</u>
- 3. The psychology behind hand cleaning- people need help is hand hygiene is to reduce the spread of COVID-19, the British Psychological Society, 7th August 2020.
